

[APWA August 2016](#) was a great success. Let's see how we can partner to make the roads safer.

eNdoto

As first time exhibitors at the recent [American Public Works Association-APWA Conference](#) in Minneapolis, we met so many industry leaders who care about pedestrian and road safety as much as we do. In addition, we identify with your objective to satisfying your customers while growing your business to meet the demands of the road safety industry. Simply put, "What is it going to take to stay competitive and keep your foothold with your customers?" "Can you find a viable and innovative solution for your city/state/municipality projects?" We at [eNdoto](#) know we can offer you many alternatives. Below is a list of some of the innovative road safety products that were very well received at APWA. Don't hesitate to review the product cards that you can link to automatically and then call us to review your next project. Our team of Project Engineers are working with some of the top roadway and bridge upgrade projects in North America.

[eNdoto's](#) extensive traffic safety divisions provide solutions that address many of the needs of the traffic industry to keep our roads safe and operating efficiently. In addition, we look forward to working with you to discuss our innovative products that will provide long-term solutions for years to come, including:

- [High performance LED](#) or solar [snow plowable surface mount road markers](#)
- Passive [high power reflectors](#)
- Optical [360-degree reflective curb markers](#)
- Flexible [self-erecting traffic posts](#)
- [Aluminum bridge rail](#) and [steel barrier systems](#)
- [Aluminum sign posts](#)
- * Noise control [sound bar systems](#) NEW!
- * [Signal Service Pedestrian Crossing Systems](#)
- * and the complete [EveluxUSA Traffic Safety Systems](#)

All [endoto's](#) products are designed to keep our roads safer, have a longer life-span and are environmentally friendly.

Just let us know if you have any questions or would like to have a more in-depth conversation. [Click here to send a direct email with a note of what you're interested in and one of us will respond promptly.](#) Or copy and paste this into your email: George@eNdotoCorp.com

We are very interested to learn more about your business and projects and how we can partner together. No project is too big or small for our team. Contact one of our Product Specialist available to review your safety needs or if you have any questions about a project, they will be glad to talk to you about that too. But until then please don't hesitate to reach out to us. Our phone number is: 860.289.8033. [If you would like a product catalog, please click here.](#)

Sincerely,
Guy Bolduc, President
