eNdoto Exhibits at 46th Annual ATSSA Expo in New Orleans

Show Participation was very strong with many potential pedestrian and road safety partnerships forged

February 7, 2016, East Hartford, CT, eNdoto participated in the 46th Annual ATSSA (American Traffic Safety Services Association), Expo on January 31-Feb. 2. At Booth 1341—1343. eNdoto, through its divisions offer all aspects of pedestrian and road safety products and solutions that address the demands and changes of the industry in keeping the roads safe and operating efficiently. eNdoto also showcased its most innovative pedestrian and road safety products that will provide long-term solutions for years to come, all designed to keep our roads safer, have a longer life-span and are environmentally friendly. This included:

- Steel barrier
- Aluminum bridge rail
- Aluminum sign posts
- High performance snow plowable and surface mount LED lighting
- Passive high power reflectors
- Optical 360 reflective curb markers

George Cancelmo, Project Design and Development Manager states, *“It was great to be participating in the ATSSA Traffic Expo, which attracted thousands of qualified buyers from every niche of the marketplace. Exhibiting at ATSSA, the premiere traffic safety expo, also gave us the opportunity to meet with key decision makers, DOT officials, manufacturers, suppliers, contractors and more. Being busy at our booth more in depth discussions with these decision makers are forthcoming.”* Cancelmo continues, *“It was also exciting to introduce eNdoto’s innovative products and solutions that have been utilized globally for many years with very positive results to road safety and to the environment as a long-term solution. Simply, our objective at eNdoto is similar to ATSSA who represents the highest standard of educational forums and that is to inform and educate the industry of the economic impact of using alternative products such as steel barriers and aluminum bridge rail and sign posts, with long life span and optimum-organic value to our environment.”*

eNdoto is looking forward to reaching out to all those who stopped at their booth and showed interest in eNdoto’s next generation pedestrian and road safety products, and continuing to parallel ATSSA’s outreach for pedestrian and road safety and “0” deaths.

About eNdoto: eNdoto prides itself at being the “go-to” source for tailored solutions ensuring traffic and pedestrian safety. Their expertise includes products and systems for roadways and bridges, transit systems, tunnels, waterways and parking lots; for education, cultural and medical facilities; for parks and recreation areas, and for residential and commercial properties, as well as vehicle and equipment lighting. They aim to satisfy the critical and growing demands for green, long-lasting safety and lighting solutions with specially focused, environmentally conscious products and systems.
