

Light Innovations & Imagination

GEOVISION Glass Pavers are an innovative design that takes functionality and architectural aesthetics to the next level. The LED's are available in a wide selection of colors. The lighted glass paver with a modern bright "NEON" glow offers beautiful illumination to pavements, pathways, landscapes and facades. Shaped identical to existing pavers allows for easy installation. *Glass Paver also available with Photoluminescent StepGlow illumination.*

FEATURES

- LED's last over 80,000 hours
- Water proof
- Optic light projection
- Bright and visible in daylight
- Wide selection of colors tailored to the architectural design theme
- Easy installation
- Maintenance free

Imagine your patio landscaping or pathways with GEOVISION Glass Pavers accenting and beautifying the architectural view. LED pavers provide functional lighting while emphasizing and beautifying environmental surroundings providing artistic elegance and creativity that will be the talk of the neighborhood.
