

TOUGH BUMPS

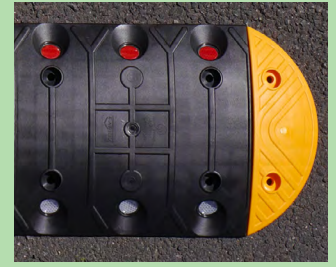

SCALABLE SPEED BUMPS FOR ALL TRAFFIC CALMING CONDITIONS

INSTALL

ANY LENGTH

FAST

Evelux USA All-purpose speed bumps are a quick and cost effective solution to traffic calming. EveluxUSA speed bumps control traffic, reduce speeds and alert drivers of sensitive areas improving vehicular traffic for safer environments for pedestrians and motorists.

Speed bumps can be assembled with solid or alternating colors providing high day time contrast while reflective cats eyes reflect, illuminate and warn approaching vehicles to slow down during the darkness hours.

Eliminate costly asphalt and labor intensive road bumps

INSTALLATION HARDWARE INCLUDED

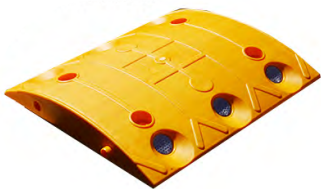

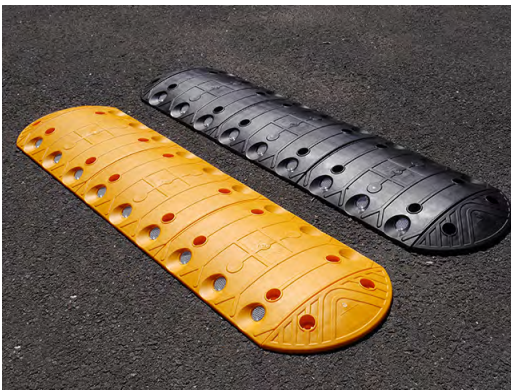

BENEFITS

Not all speed bumps are alike, road widths and speeds vary. ToughBumps solve the variations in traffic calming projects by allowing installations be assembled like building blocks adapting to the desired length of the roadway.

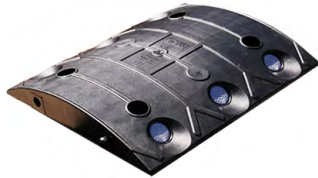

Best of all, ToughBumps expand the ability to create more creative speed reducing solutions by creating short alternating bumps that force vehicles to slow down and negotiate the transition area through the safety zone.

ADVANTAGES

- 6 bright recessed reflectors per section
- Exceeds most all traditional speed bumps for safety and compliance.
- Does not dry and crack like standard heavy rubber bumps
- Guaranteed service life even in the most aggressive road conditions
- Fully scalable
- Freedom of ToughBump modular length “Short or Long”
- Compact and easily assembled to any length
- Complete with all mounting hardware
- ADA Compliant
- Color Freedom, yellow black or alternating
